

Stellar Phoenix Macintosh (v2.0) – secure, fastest and reliable data recovery software for Macintosh Operating System

Do you see "The flashing question mark appears during startup"?

Are you in a situation where your MAC drive does not mount?

Did you accidentally delete your documents, photos & music folder?

Do you see a message "The disk is damaged do you want to initialize?"

Zapped by "-127 error disk could not used/found"?

We have a solution.

Stellar Phoenix Macintosh Data Recovery Software

Stellar Phoenix Mac data recovery software helps you to recover your files, photos, music & videos from almost all instances of data loss. Few commonly reported data loss scenarios where Stellar Phoenix Mac can help you restore your lost data are:

- If your hard drive won't mount
- If your hard drive is corrupt and you can't get files from it
- If you have deleted files that you would like to recover
- You have initialized your hard drive or deleted the volumes
- Your hard drive has developed bad sectors

Stellar Phoenix Mac data recovery is the best help that you could ask when you have lost your data. Stellar Phoenix would scan your drive for lost data, analyze and build a list of recoverable files and folders that you can recover. Recover the entire drive contents or select the files & folders that you wish to recover.

Key Advantages:

The software helps you recover...

- Recovers data from deleted volumes
- Recovers your deleted files such as documents, photos, music and videos etc
- Recovery of data with proper size and hierarchy
- Supports HFS, HFS+, HFSX, HFS Wrapper file systems

Stellar Phoenix Macintosh (v2.0)

Key Features:

Advance Search: The software is powered by new engine which helps scanning the drive three times faster. Standard search is very fast and efficient in normal cases. If you are not able to get the desired results, it also offers advanced search. The method has greater possibility to discover lost data. It scans each cluster of the logical volume and also scans the entire unused cluster for known file types.

Image Preview: See the preview of scanned images and have an overview of recovery results while using the demo version itself

RAW Data Recovery: Helps you recover files when file system data structures had severe corruption. The feature also enables you to **recover deleted files/ folders on MAC OS**

Enhanced Photo Recovery: Recover RAW camera format files: Now you can recover your priceless photographs with Stellar Phoenix Macintosh Data Recovery Software. The RAW Recovery option provides enhanced photo recovery and supports all major camera format file types such as NEF, CRW, CR2, ORF, SR2, K25, KDC, DCR, RAF, MRW, PEF, and X3F..

Create Image: Create an image of hard disk drive, specific logical volume or even a CD, when you encounter bad sectors in your storage media and get better recovery results in less time.

Aqua Interface: The new and polished aqua appearance makes the program as beautiful and user friendly as your MAC. The streamlined screen layout enable users to spend more time focused on recovering data.

Save Scan:

- Resumes recovery at a later stage. This feature is extremely helpful if you need to perform data recovery in phases.
- You can save the scan results and use it to recover data at a later stage. You need not to rescan every time.

System Requirements:

Processor:	Intel, Power PC (G3 or later)
Operating System:	Mac OS 10.3.9 and above
Memory:	256 MB RAM
Disk Space:	30 MB of free space

Stellar Phoenix Macintosh (v2.0)

About Stellar:

Stellar is a trusted name in the field of data recovery and data safety.

Through its advanced Research and Development; Stellar has been providing data recovery services and solution for all media types and operating systems. Equipped with necessary infrastructure and trained manpower Stellar provides accurate, confidential & cost effective data safety & integrity solutions to its customers.

- Pioneer and market leader in Data Safety and Data Recovery Software & Solutions.
- Over 13 Years of rich experience.
- An ISO 9001-2000 recommended company
- Offer Express Data Recovery Services from all major storage devices & operating systems.
- Thousands of satisfied customers spread across 137 countries.
- Extensive partner network worldwide.
