- Optimized photos display for iOS systems.
- Optimized message and contact display for iOS systems.
- Option to preview notes, calendar, and reminder.
- Supports iPhone 8, 7, 7s, 6s, 6 Plus, 6, 5s, 5c, 5, 4s and 4.
- Supports iPad.
- Supports iOS 11.x (till 11.3), 10.x, 9.x, 8.x, 7.x, 6.x.
- The software supports iTunes 12.x, 11.x.
- Supports Operating System Windows 10 / 8.1 / 8 / 7.
- Supports recovery of Contacts, Messages, Call History, Calendar, Notes, Reminders and Safari Bookmarks from your iOS device.

Installation Procedure

Before installing the software, check that your computer meets the minimum system requirements:

Minimum System Requirements:

Processor : Intel Processors

Operating System : Windows 10 / 8.1 / 8 / 7

Memory : 1 GB RAM

iPhone : iPhone 8 / 7 / 7s / 6s / 6 Plus / 6 / 5s / 5c / 5 / 4s / 4

Hard Disc : 100 MB free space

Note: Please download the latest version of iTunes before running **Stellar Data Recovery for iPhone**.

To install the software, follow these steps:

1. Double-click the **StellarDataRecoveryforiPhone.exe** executable file to start the installation. **Setup - Stellar Data Recovery for iPhone** dialog box is displayed.
2. Click **Next**. The **License Agreement** dialog box is displayed.
3. Choose **I accept the agreement** option. The **Next** button is enabled. Click **Next**. The **Select Destination Location** dialog box is displayed.
4. Click **Browse** to select the destination path where you want to store the setup files. Click **Next**. You see the **Select Start Menu Folder** dialog box.
5. Click **Browse** to provide a path for the program's shortcuts. Click **Next**. The **Select Additional Tasks** dialog box is displayed.
6. Choose the checkboxes as per your choice. Click **Next**. The **Ready to Install** dialog box is displayed.
7. Review the entries. Click **Back** if you want to change them. Click **Install** to start the installation. The installation window shows the progress.
8. After completing the process, the **Completing the Stellar Data Recovery for iPhone Setup Wizard** window displays. Click **Finish**.

Clear the **Launch Stellar Data Recovery for iPhone** checkbox to stop the automatic launch of software.

Launching the Software

To launch Stellar Data Recovery for iPhone in Windows 10:

- Click Start icon -> All apps -> **Stellar Data Recovery for iPhone** -> **Stellar Data Recovery for iPhone**

Or,

- Double click **Stellar Data Recovery for iPhone** icon on the desktop.

Or,

- Click **Stellar Data Recovery for iPhone** tile on the home screen.

To launch Stellar Data Recovery for iPhone in Windows 8.1 / 8:

- Click **Stellar Data Recovery for iPhone** tile on the home screen.

Or,

- Double click **Stellar Data Recovery for iPhone** icon on the desktop.

To launch Stellar Data Recovery for iPhone in Windows 7:

- Click **Start** -> **Programs** -> **Stellar Data Recovery for iPhone** -> **Stellar Data Recovery for iPhone**.

Or,

- Double click **Stellar Data Recovery for iPhone** icon on the desktop.

Or,

- Click **Stellar Data Recovery for iPhone** icon in **Quick Launch**.

Ordering the Software

To know more about **Stellar Data Recovery for iPhone**, click <https://www.stellarinfo.com/media-tools/iphone-data-recovery.php>

To purchase the software online, please visit <https://www.stellarinfo.com/media-tools/ios-data-recovery/buy-now.php>

Select either of the methods given above to purchase the software.

Once the order is confirmed, you receive a registration key through e-mail. You require this key to activate the software.

Registering the Software

The demo version is just for evaluation purpose and must be eventually registered to use the full functionality of the software. The software can be registered using the Registration Key which you receive via email after purchasing the software.

To register the software:

1. Run the demo version of **Stellar Data Recovery for iPhone** software.
2. On the main user interface, click the **Register** option. The **Register** window is displayed as shown below:

3. If you don't have the registration key, click the **Get it now** button in the window to go online and purchase the product.
4. Once the order is confirmed, a **Registration Key** will be sent to the email provided.
5. Type the **Registration Key** (received through email after purchasing the product) and click **Register** button (Please ensure that you have an active Internet connection).
6. The software will automatically communicate with the license server to verify the entered key. If the key you entered is valid, the software will be registered successfully.
7. The '**Activation Completed Successfully**' message is displayed after the process is completed successfully. Click **OK**.

Updating the Software

There are periodic software updates for **Stellar Data Recovery for iPhone**. The software updates should be done to keep the software up-to-date. The updates can be a newly added functionality, a new feature, a new service or any other information that can be important for improvement. The update option in the application is capable of checking for the latest updates. It checks the both latest minor and major versions available online. You can easily download minor versions through the update wizard. However, the major version, if available, has to be purchased. While updating the software, it is recommended to close all running programs. Note that the demo version cannot be updated.

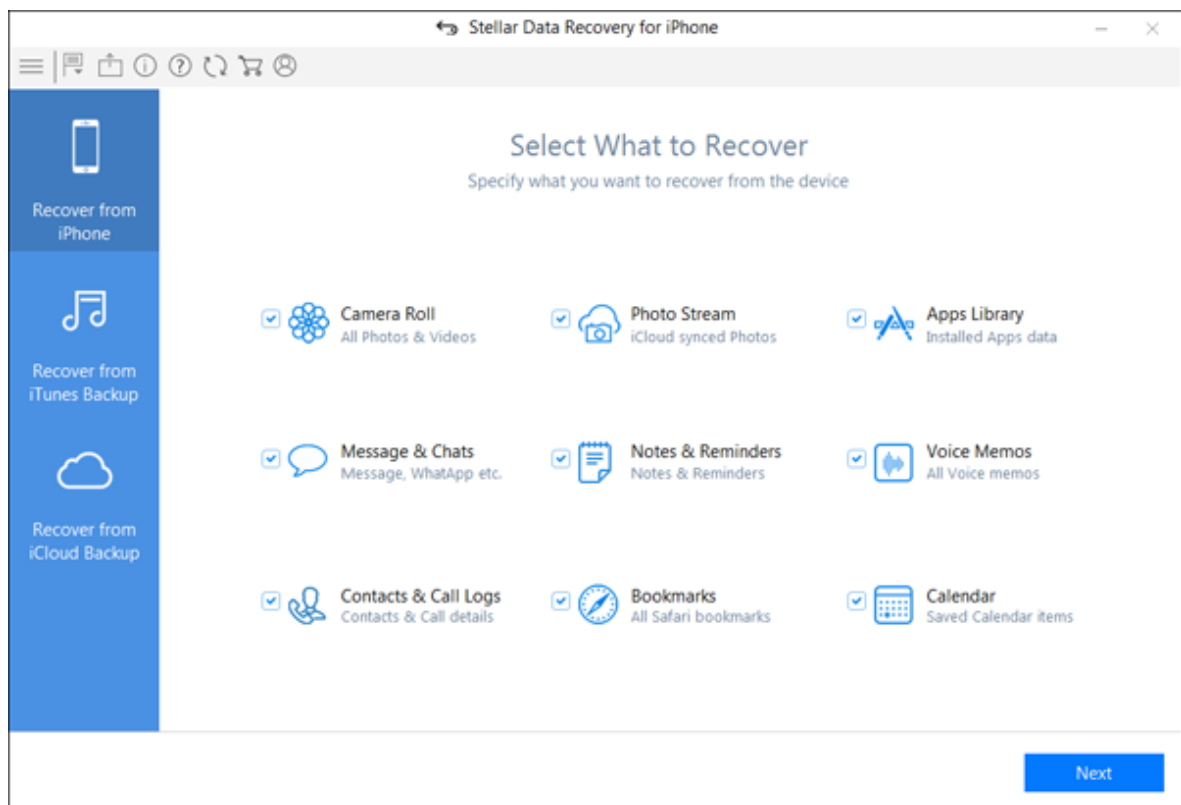

To update the application, follow the steps given below:

1. Click on the **Update Wizard** button from the **Tools** menu bar. The **Update Wizard** is displayed.
2. Click **Next**. A busy timer indicates the searching of updates. If it finds any new version, a message indicates the availability.
3. If a message displays that no updates are available, click **Cancel** to close the wizard.
4. Click **Next**. The software starts downloading the update files from the server. The software upgrades to the latest version, when the process completes.

User Interface

Stellar Data Recovery for iPhone software has a very easy to use Graphical User Interface. The user interface contains features required for complete recovery or saving of Photos, Contacts, Messages, Message Attachments, Call History, Calendar, Notes, Notes Attachments, Voice Memo, Safari Bookmarks, Reminder, WhatsApp, WhatsApp Attachments, Viber, Tango and Apps Library. It recovers data from your iOS device, iTunes and iCloud backup in an efficient manner.

Recover from iPhone

You can use the **Recover from iPhone** option to scan your iOS device and recover data (like contacts, messages, reminders, calendars, notes) from it. This option scans the iOS device directly to find data that was recently deleted or lost.

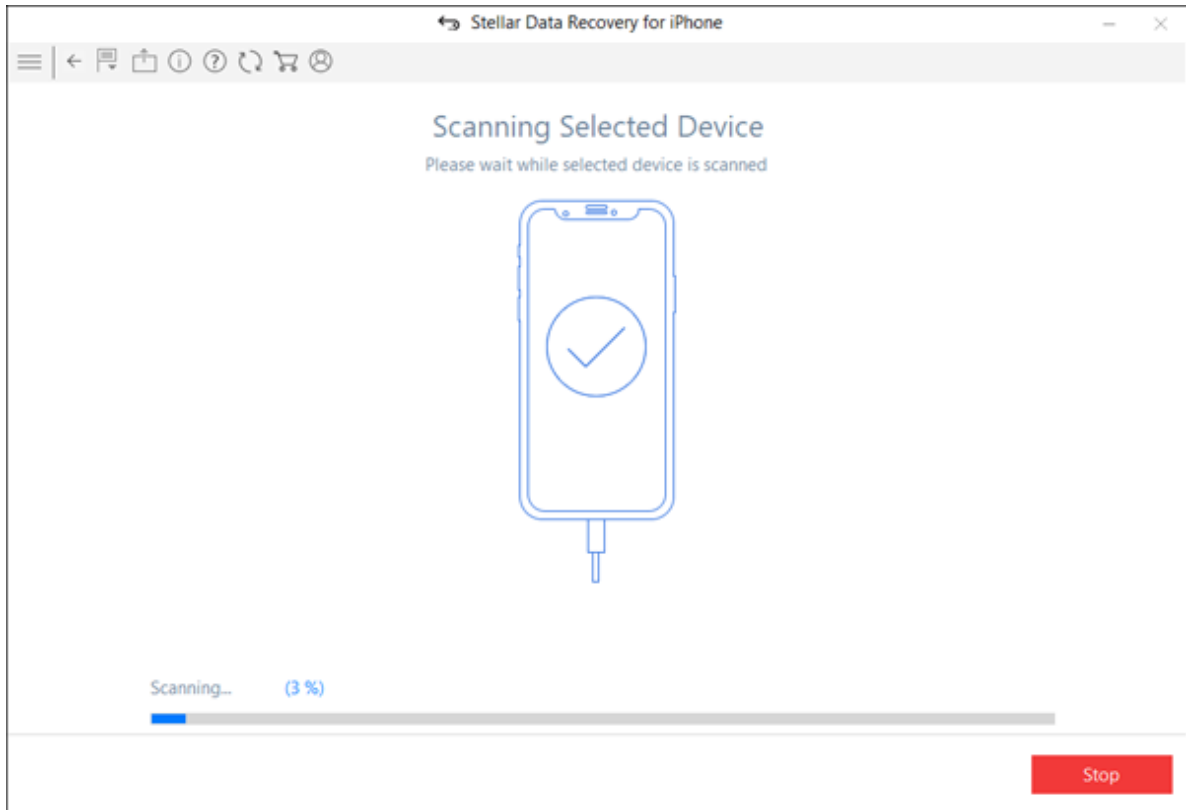

Note: Install iTunes before you use **Stellar Data Recovery for iPhone** software. iTunes services should be running while you are scanning/analyzing an iOS device.

To use the **Scan Device** option of the software, follow the steps given below:

1. Run **Stellar Data Recovery for iPhone**.
2. On the **Stellar Data Recovery for iPhone** main screen, Select the **Recover from iPhone** option.

3. From **Select What to Recover** Screen, select the type of data i.e. **Everything, Photos and Videos, Messages and Call Log, Memos and Others**, you want to recover Click **Next**.
4. Plug your iOS device into your computer and select that device to proceed further. The application starts analyzing the device you have selected. In case you have connected multiple devices, the application lists all connected devices. Select the desired device from which you want to recover the data.

Note: After you connect the device, a Trust/Untrust dialog prompts on your device. You need to Trust a computer to enable sync and data transfer between the iPhone/iPad and the computer. If you tap on "Don't Trust", iTunes is not able to recognize your device at all.

5. If your iPhone is encrypted, a dialog box will open prompting you to enter the password. Enter the password and click **OK**.
6. After successful analysing and scanning, you can now preview and save data. Following file types are supported: Camera Roll, Photo Stream, Contacts, Messages, Message Attachments, Call history, Calendar, Notes, Notes Attachments, Voice Memo, Reminder, Safari Bookmarks, WhatsApp, WhatsApp Attachments, Viber, Tango, WeChat, Line, Kik and Apps Library. From the left-hand side tree view, click the supported file type under the listed iOS device and all items under the selected supporting type head are listed.

Note: "Recover from iPhone" is already selected. by default when you start the application.

Recover from iTunes Backup

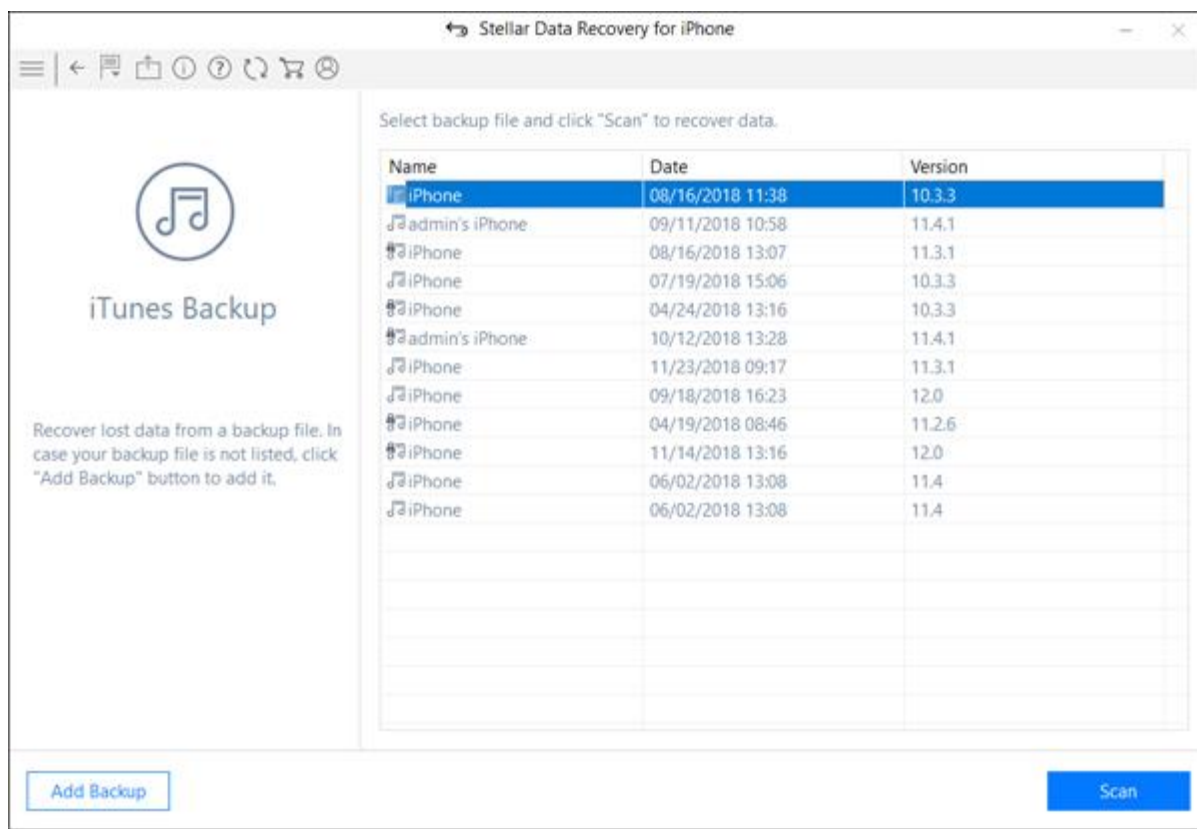

You can scan an iTunes backup file for data if you have synchronized your iOS device with iTunes earlier. Scanning backup file is helpful in case you have lost your data. You can then recover the lost data from iTunes backup files using **Stellar Data Recovery for iPhone** software.

To use the **Scan Backup** option of the software, follow the steps given below:

1. Run **Stellar Data Recovery for iPhone**. (**Note:** You do not need to connect your iOS device for recovering data from iTunes backup files)
2. On the **Stellar Data Recovery for iPhone** main screen, select the **Recover from iTunes Backup** option.

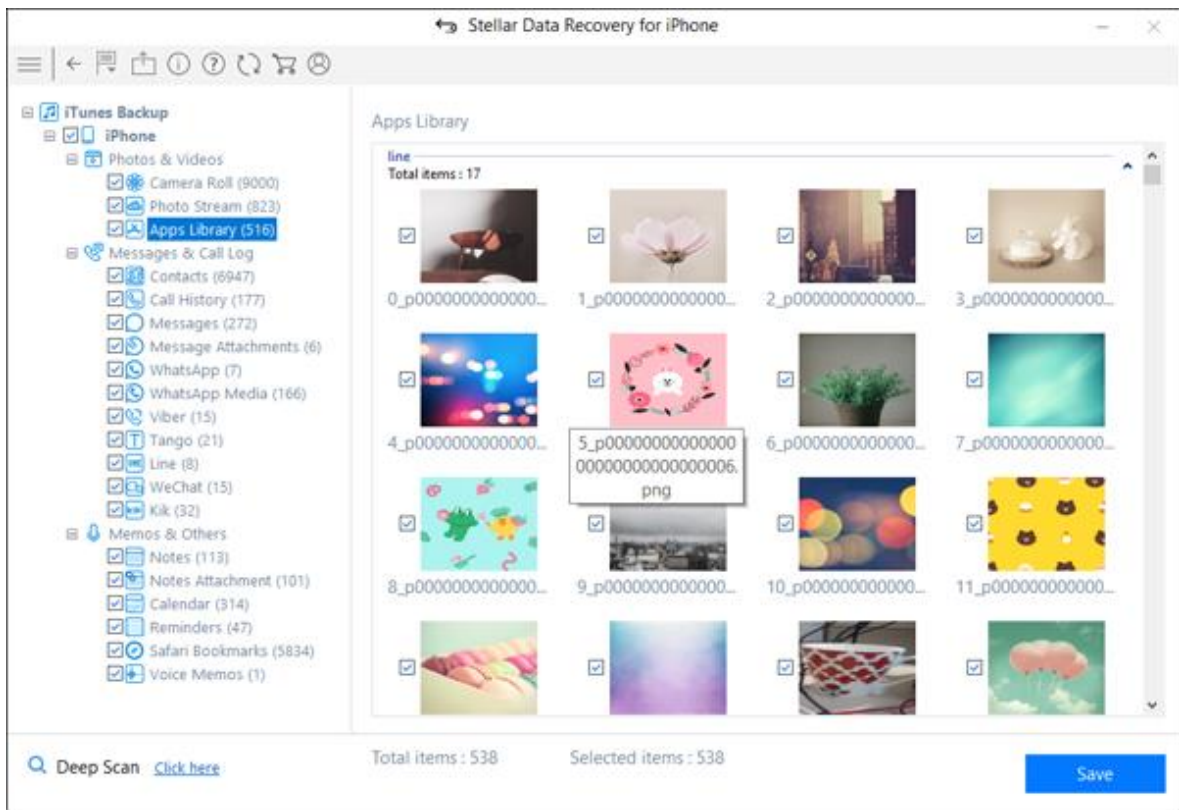

3. After successful analysis, item selection window will pop up. Select the type of data i.e. **Everything**, **Photos and Videos**, **Messages and Call Log**, **Memos and Others**, you want to recover. Click **Next**.
4. The application lists all the iTunes backup files listed in your systems.

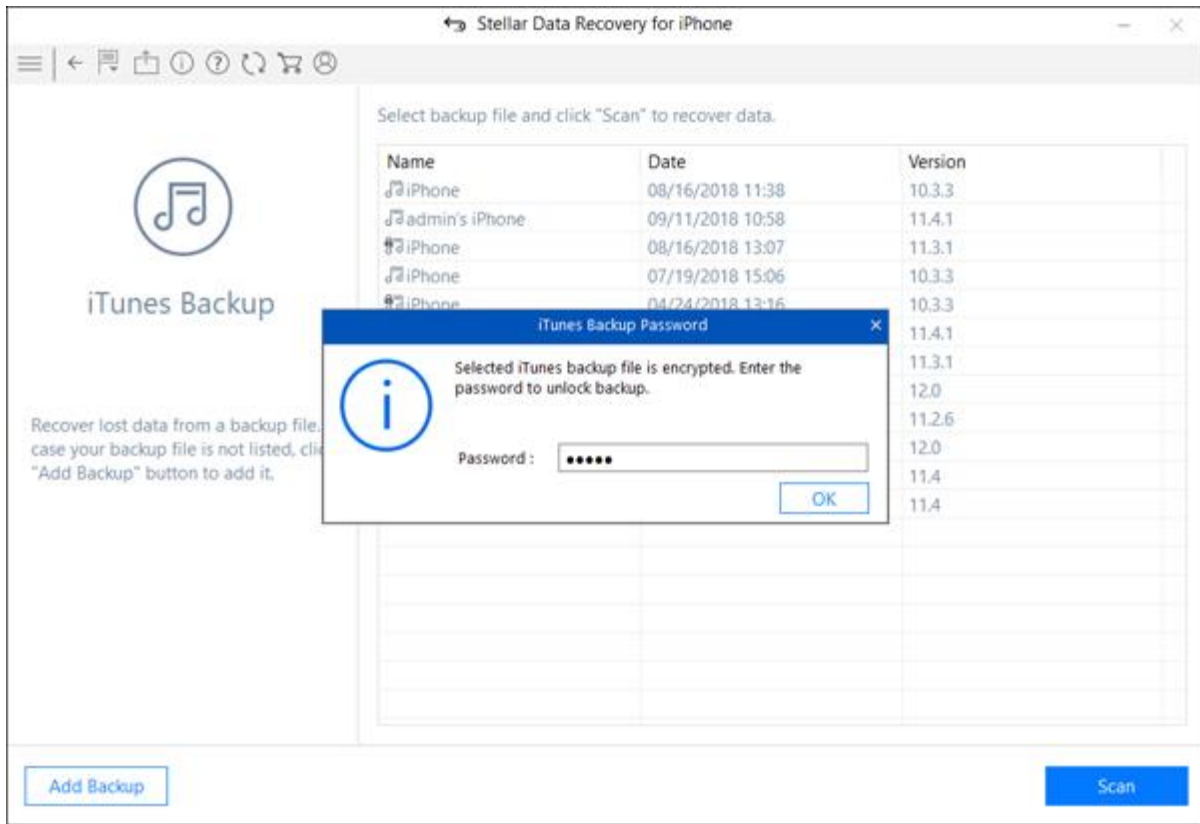

Note : A window will appear If you don't have any backup file giving an option of manually adding the backup file from your system using the **Add Backup** option. You need to click (**Add Backup**) option and then browse to the iTunes backup location, select it and then click **OK**

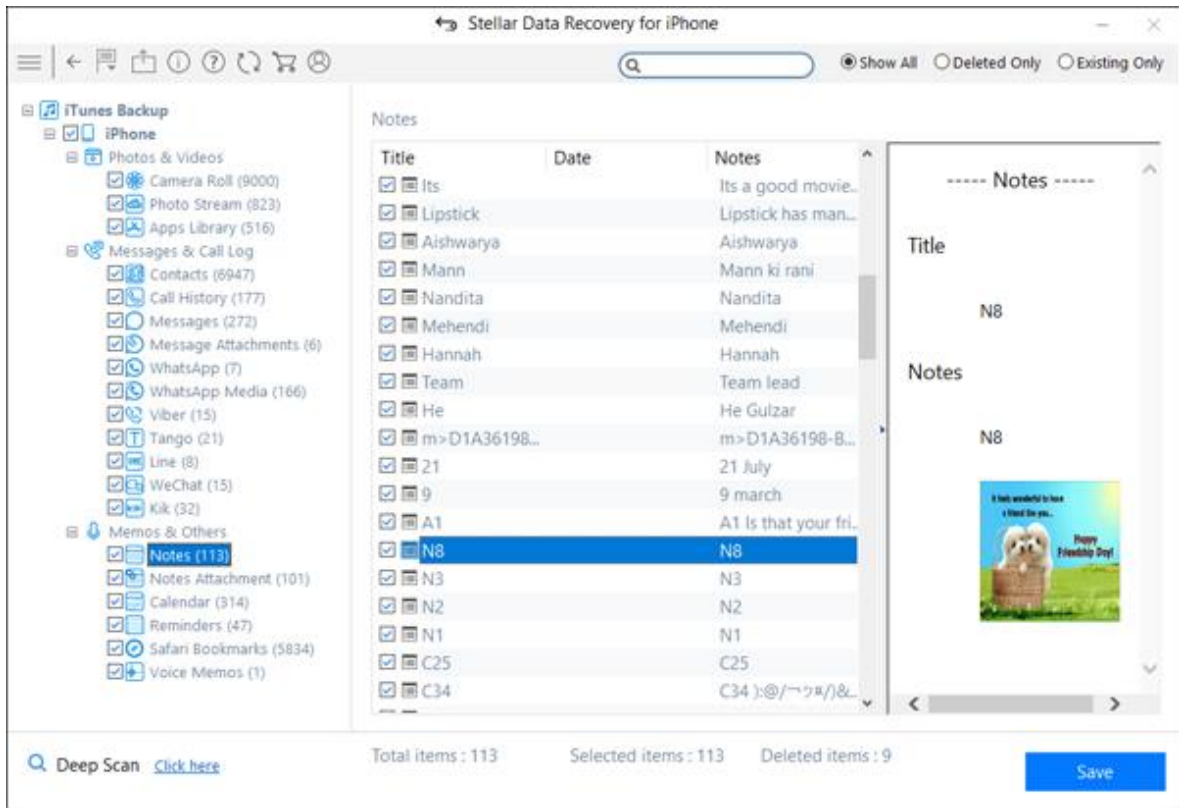

5. Select an iTunes backup from which you want to preview and save data. You can save data from following: Camera Roll, Photo Stream, Contacts, Messages, Message Attachments, Call history, Calendar, Notes, Notes Attachments, Reminder, Voice Memo, Safari Bookmarks, WhatsApp, WhatsApp Attachments, Viber, Tango, WeChat, Line, Kik and Apps Library. (**Note:** All deleted items are listed in red whereas all others are black.)

Note : If your backup is encrypted, a dialog box will open prompting you to enter the password. Enter the password and click **OK**.

6. From the tree view, click on the supported file categories under the listed iTunes backup file which lists all items under the selected category head.
7. You can either select all or a few items (by selecting the checkboxes in front of them).

Note:

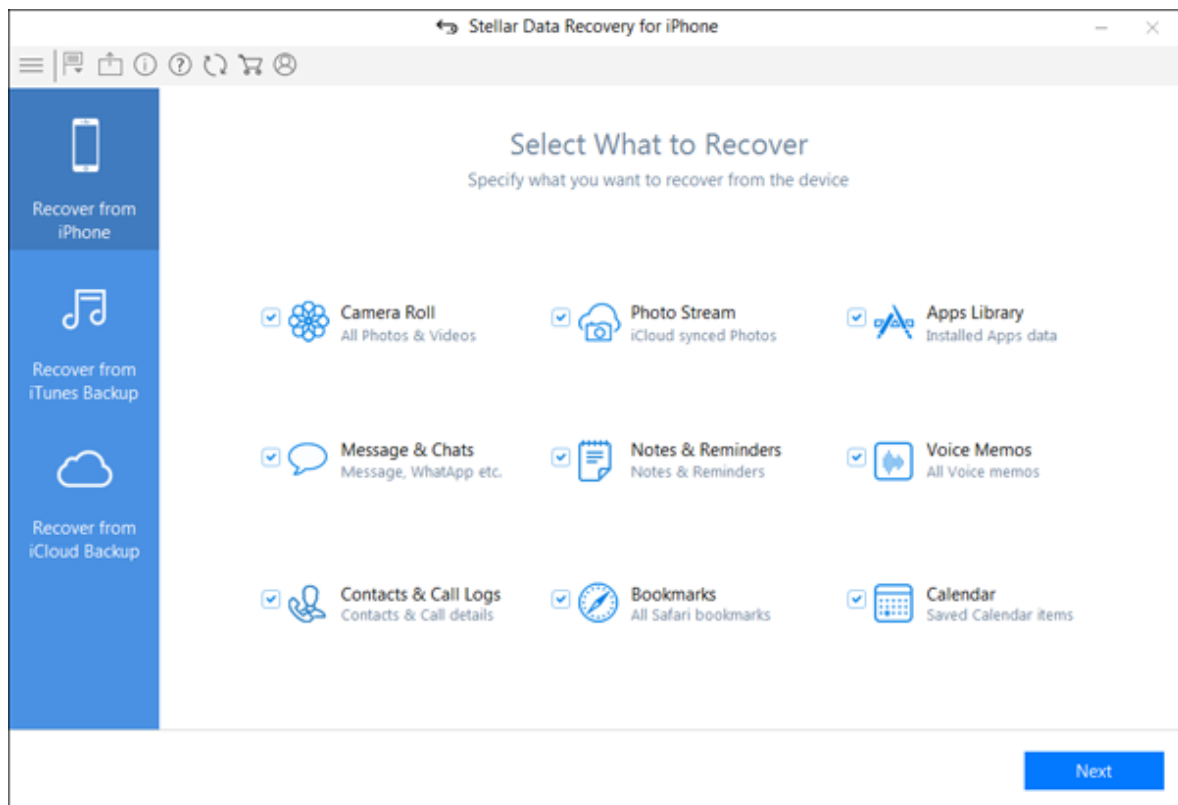

- You can preview the existing and deleted items, and you can also search for a specific item by typing a keyword in the search box.
 - Click **Deep Scan** if your desired data is not included in the list.
8. Click **Save** to confirm it. Select a destination to save the data.

Recover from iCloud Backup

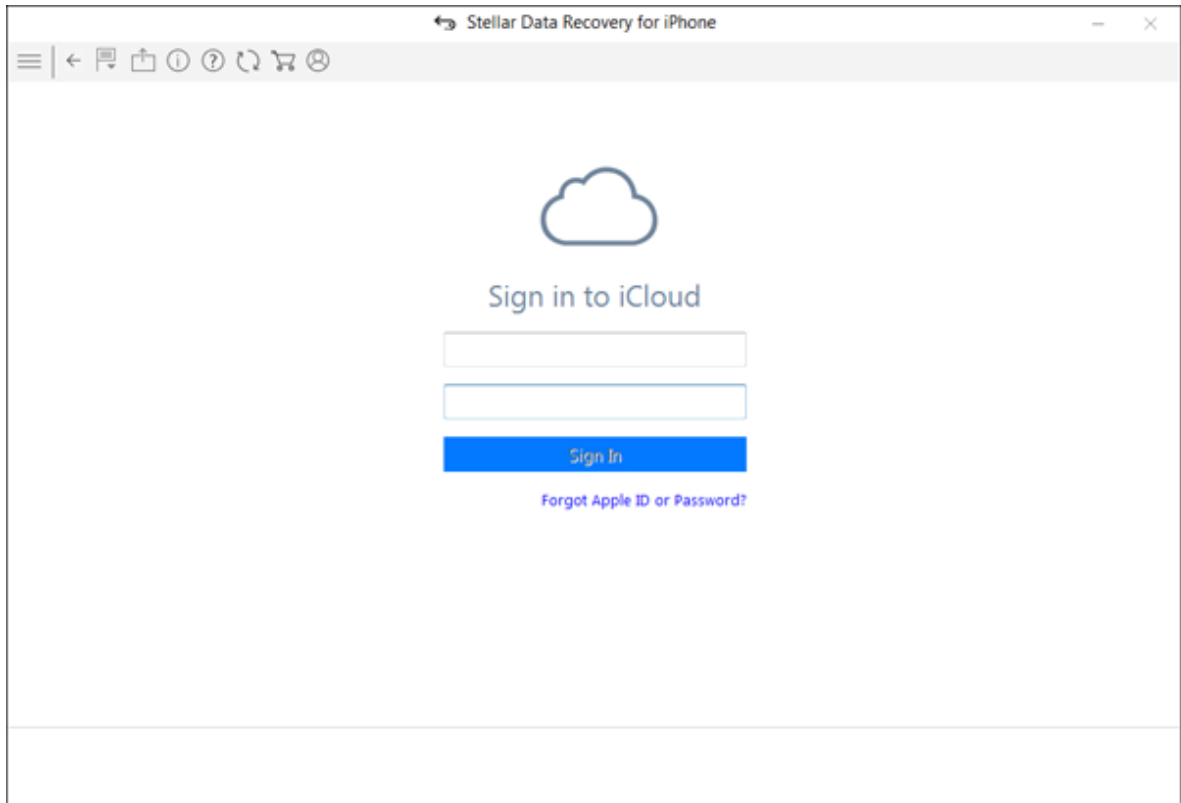

You can scan an iCloud backup file for data if you have synchronized your iOS device with iCloud earlier. To restore or recover your lost files from iCloud backup, you need **Stellar Data Recovery for iPhone** to help you.

To use the **iCloud Backup** option of the software, follow the steps given below:

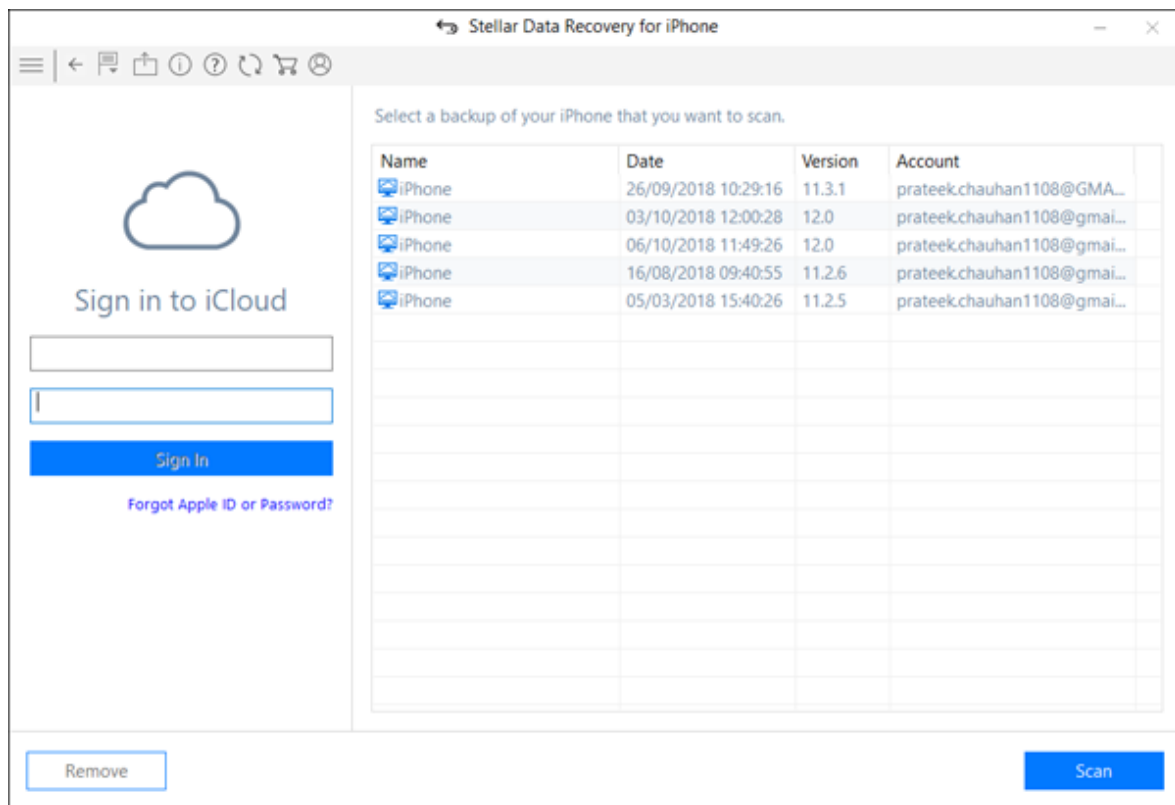

1. Run **Stellar Data Recovery for iPhone**. (**Note**: You do not need to connect your iOS device for recovering data from iCloud backup files)
2. On the **Stellar Data Recovery for iPhone** main screen, select the **Recover from iCloud Backup** option.

3. On Main Screen Select the type of data such as Photos, Videos, Installed Apps data, Messages, Chats, Notes, Reminder, Voice Memos, Contact, Call details, Bookmarks and saved Calendar Items which you want to recover. Click **Next**
4. Enter the **Apple ID** and **Password** to get a list of all available backup files from iCloud.

5. Scan and Download the iCloud backup files.

Note: In case you do not have any backup with the account entered, the dialog box shown below appears.

6. Select an iCloud backup from which you want to preview and save data. You can save data from following: Camera Roll, Photo Stream, Contacts, Messages, Message Attachments, Call History, Calendar, Notes, Notes Attachments, Reminders, Voice Memos, Safari Bookmarks, WhatsApp, WhatsApp Attachments, Viber, Tango, WeChat, Line, Kik and Apps Library.

- From the tree view, click on the supported file categories under the listed iCloud backup file which lists all items under the selected category heading.

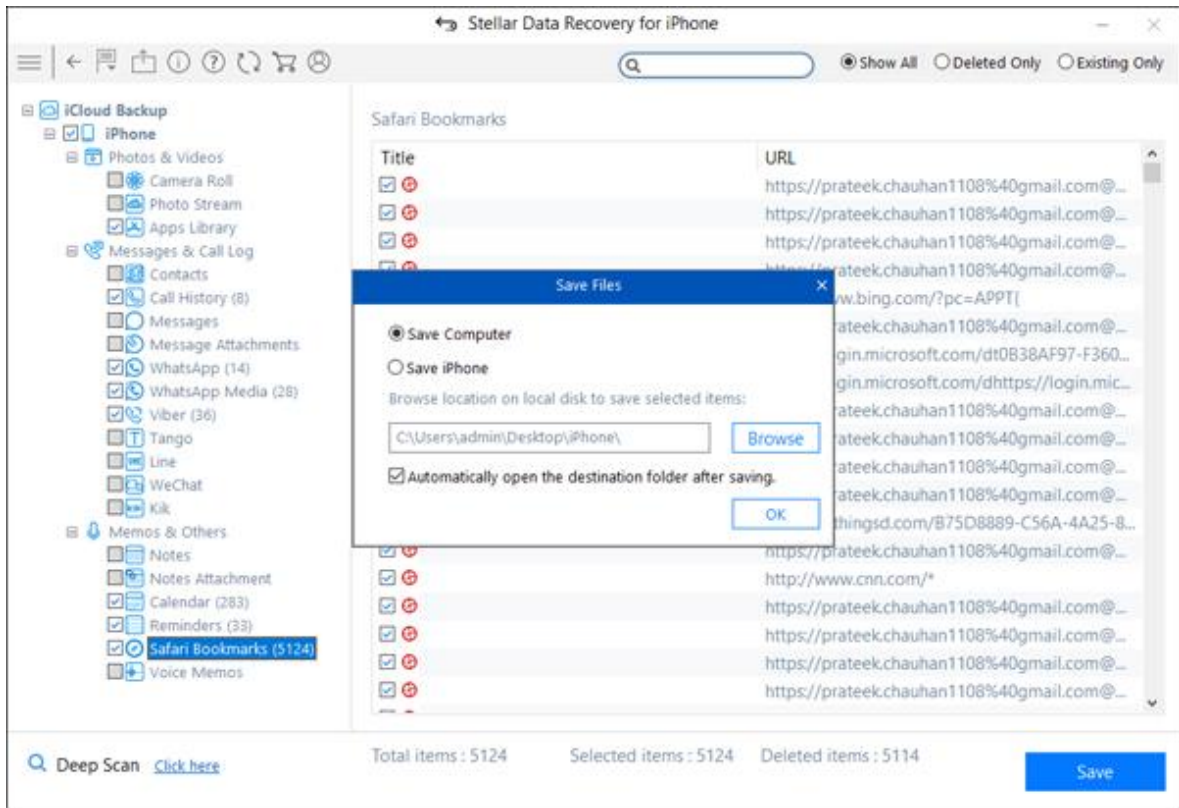

8. You can either select all or a few items (by selecting the checkboxes in front of them).

Note:

- You can preview the existing and deleted items, and you can also search for a specific item by typing a keyword in the search box.
- Click **Deep Scan** if your desired data is not included in the list.

9. Click **Save** to confirm it. Select a destination to save the data.

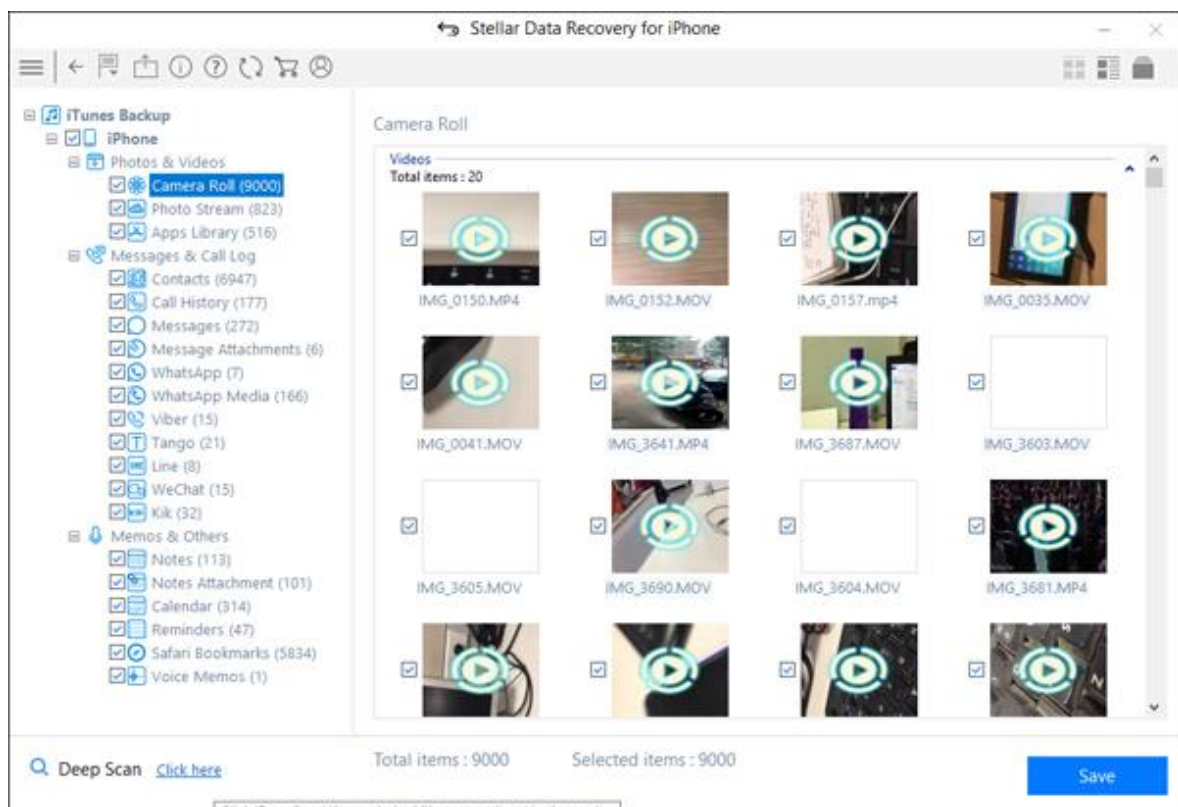

Deep Scan

Deep Scan allows you to recover data from iPhone. It does a comprehensive scan of the iOS devices and iTunes backup to recover each and every bit of lost or deleted data. It searches for lost files on the basis of file signature. This recovery option recovers everything that is found in the selected source. This option is especially helpful in case of severely deleted and corrupted iPhone data.

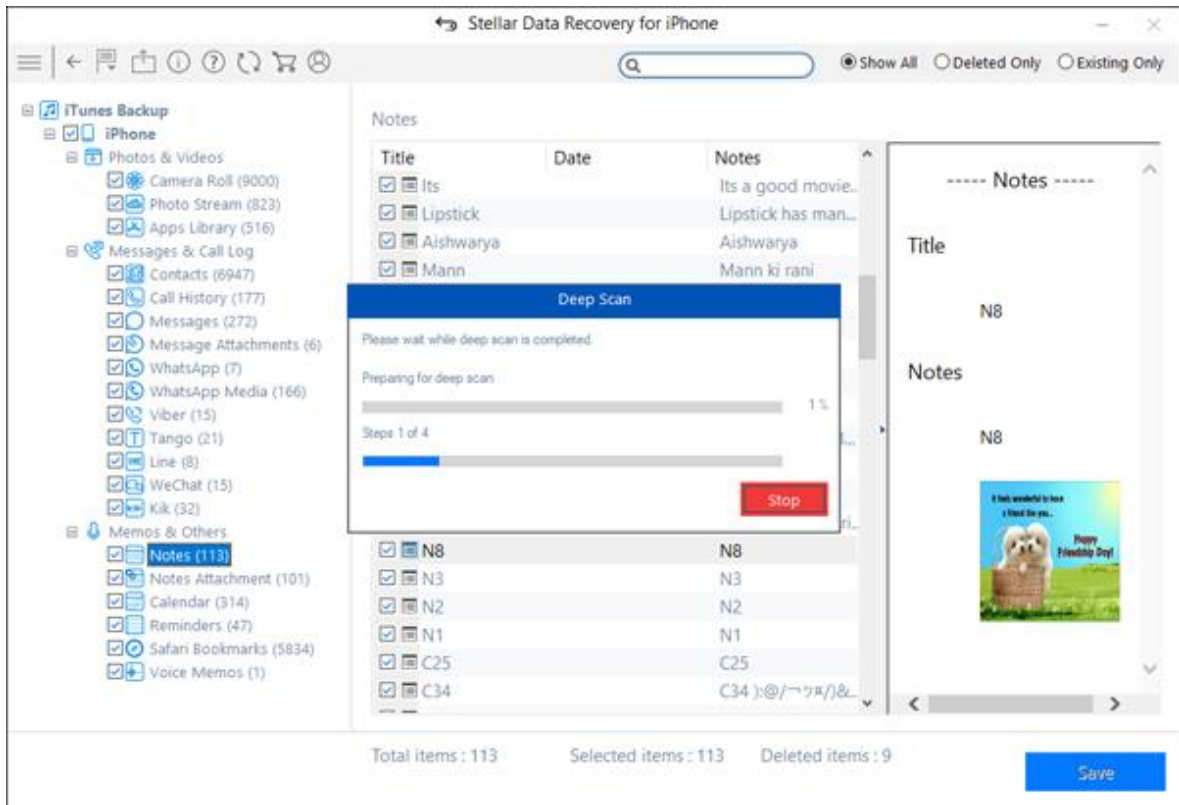

In case, after the quick scan process is completed and your desired file is not included in the list of files detected, you can opt for **Deep Scan** to perform a comprehensive scan of the selected device and backup.

To perform Deep Scan:

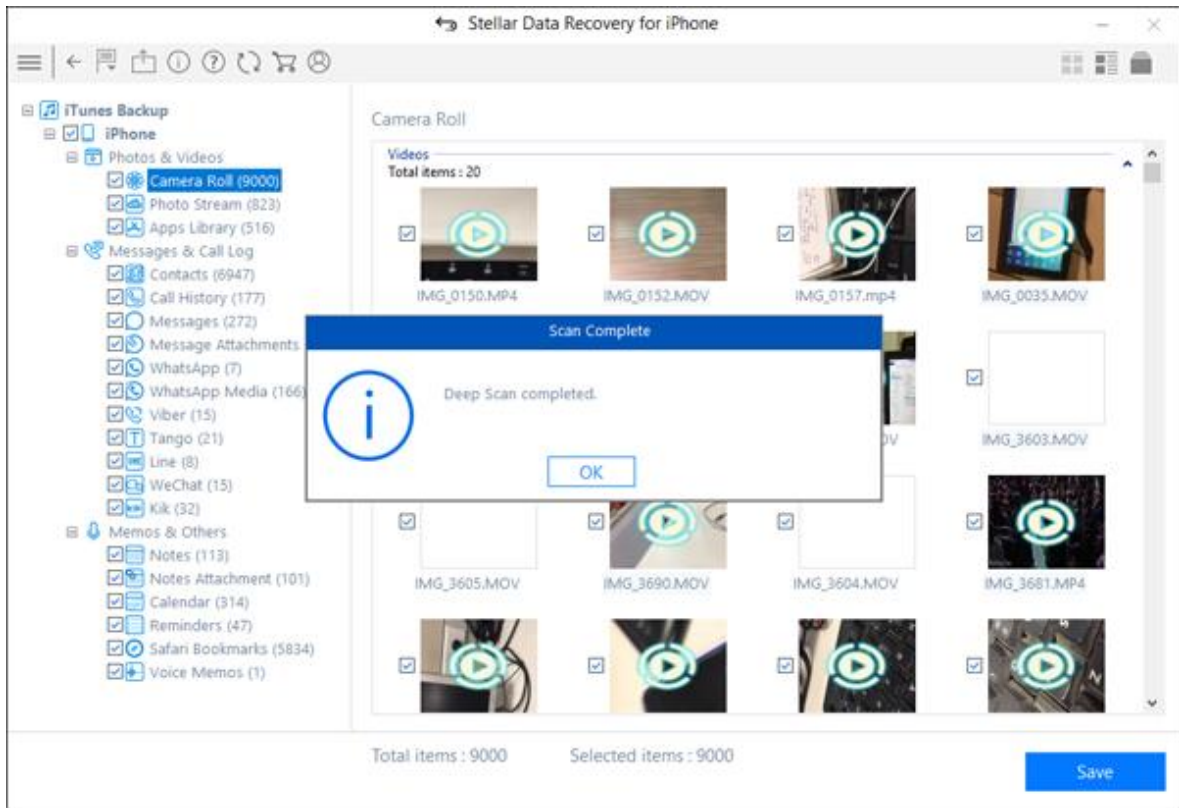

1. Once quick scan is completed, in the preview window choose **Click Here** option given at the bottom of the window to start **Deep Scan**.

2. A screen showing the scanning process is displayed. Click **Stop** to stop the scan at any point.

3. Once the scanning process is completed, a dialog box displaying the message '**Deep Scan completed**' is displayed.

Note : In case the additional data is not recovered through Deep Scan, a dialog box displaying the message '**Deep Scan completed. No additional data found**' is displayed.

- Files found during Deep Scan can be viewed in the preview window and saved at any desired location.

Export File to iPhone

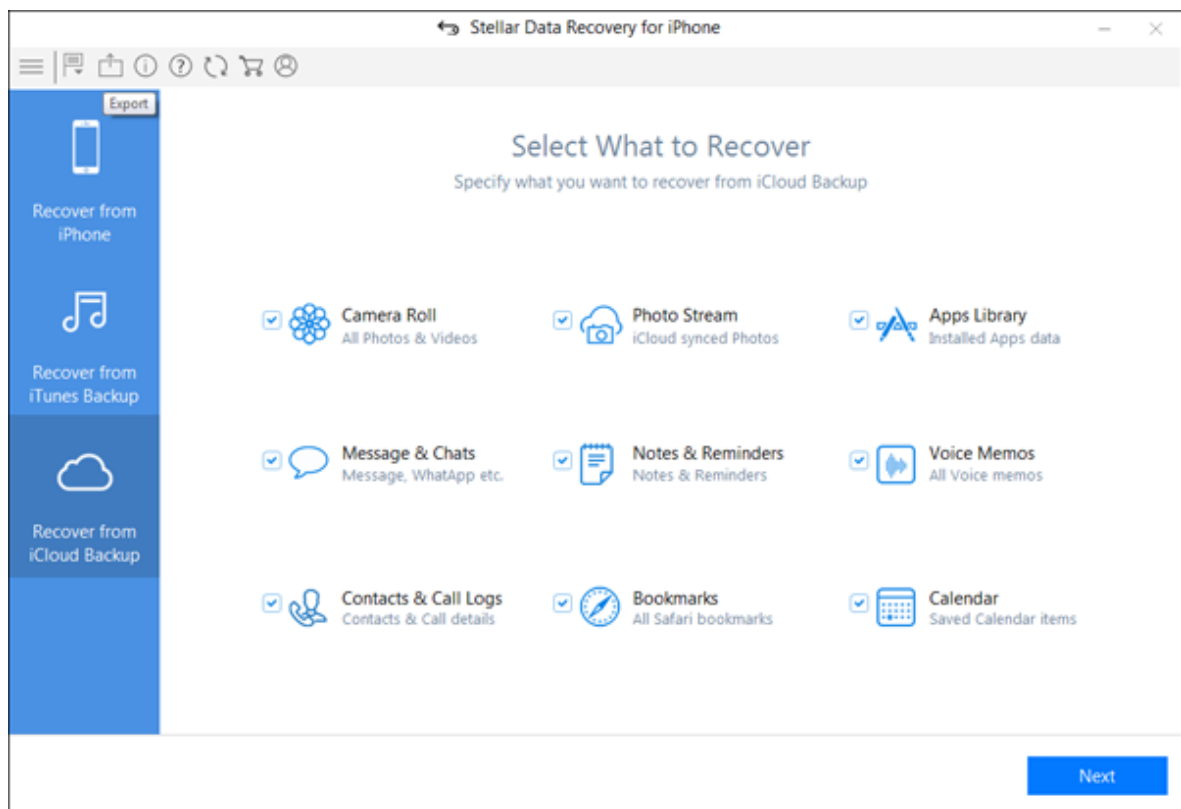

Export file to iPhone option of the software allows you to transfer recovered files such as photos, videos, audio, contact, notes, safari bookmarks and calendar from PC to iPhone. You can select the required source file type and its associated files which you want to import.

To use the **Export file to iPhone** option of the software, follow the steps given below:

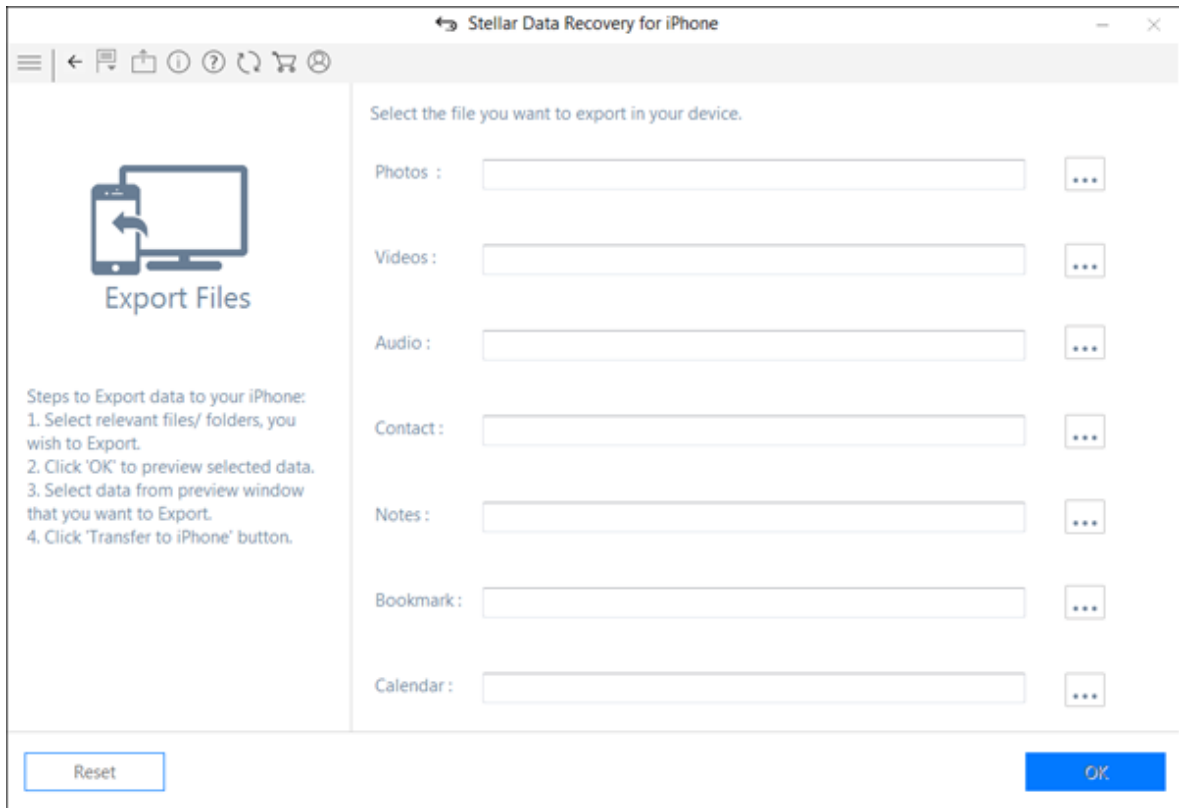

1. Connect your iPhone to your computer via USB cable. Run **Stellar Data Recovery for iPhone**.

Note: You can also run the **Stellar Data Recovery for iPhone** application before connecting your iOS device to the computer. In case you run the application. First, you are prompted to connect the device.

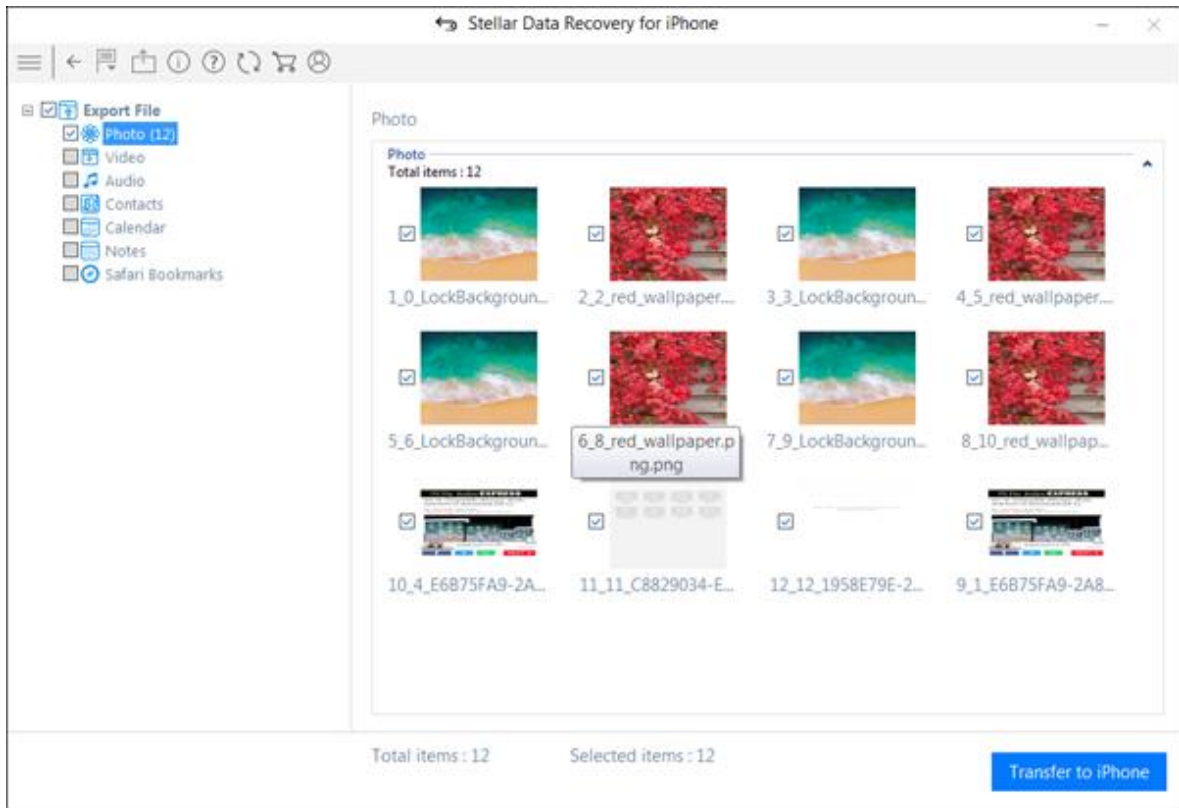

2. From the **Stellar Data Recovery for iPhone** home screen, select the **Export file to iPhone** option in the Menu Bar.

3. A new window appears. From that window, select the target file which you want to import to your iPhone by clicking the **Browse** button in front of the supported file types. For example, if you want to transfer contacts from your computer to your iPhone, click the **Browse** button in front of the **"Contact"** text box.

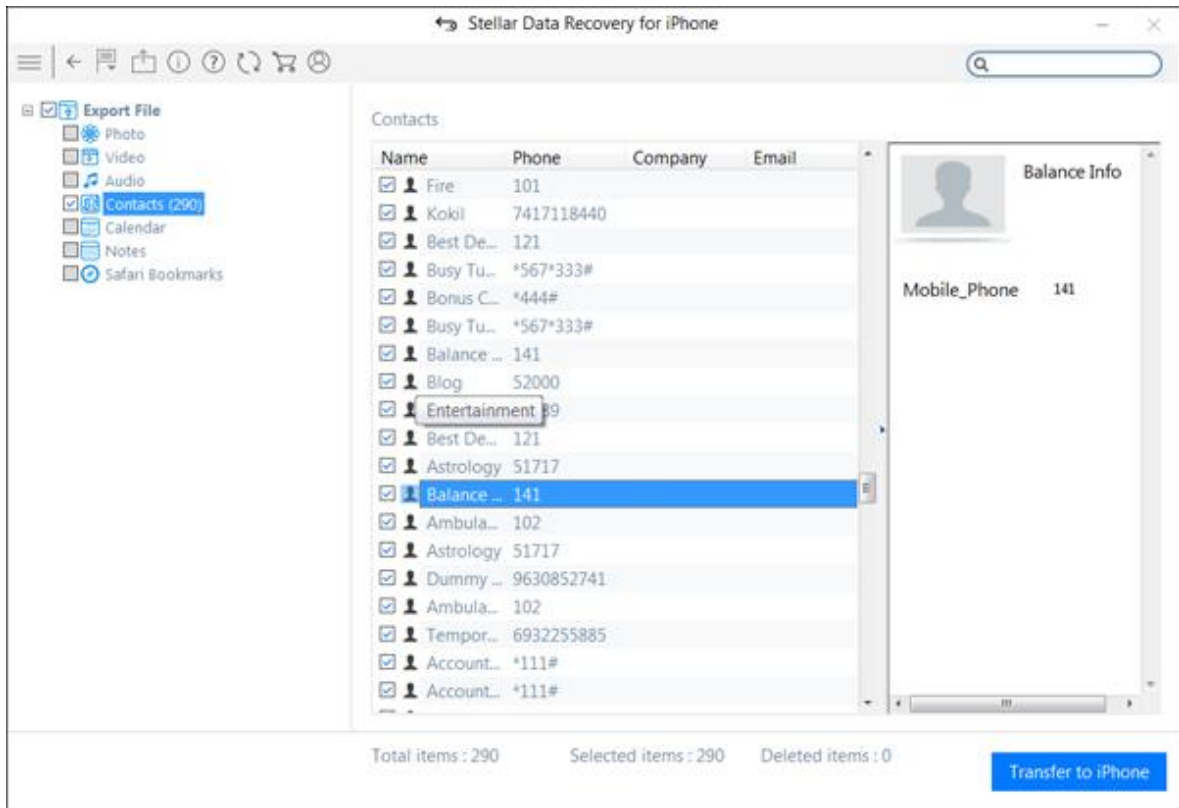

4. You can also reset the location of the selected file/folder by clicking the **Reset** button.
5. Click **OK**. You can now preview and transfer the following supported file categories: Photos, Videos, Audio, Contact, Calendar, Notes and Safari Bookmarks. From the left-hand side tree view, click the supported file category under Export Data from File. It lists all the files under the selected category.

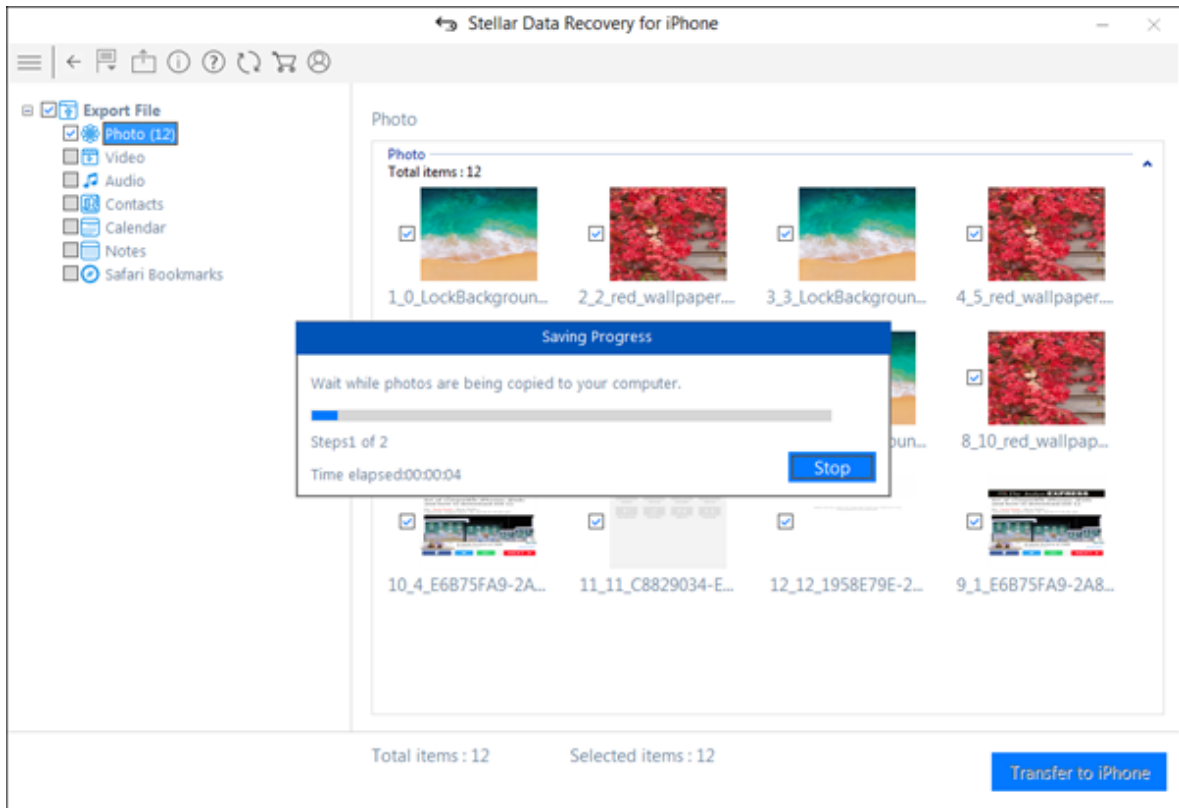

Note: In case you have connected multiple iOS devices, you get a screen prompting you to select the desired device to which you want to transfer the data.

6. You can either select all or some specific files which you want to import (by selecting the checkboxes in front of them).

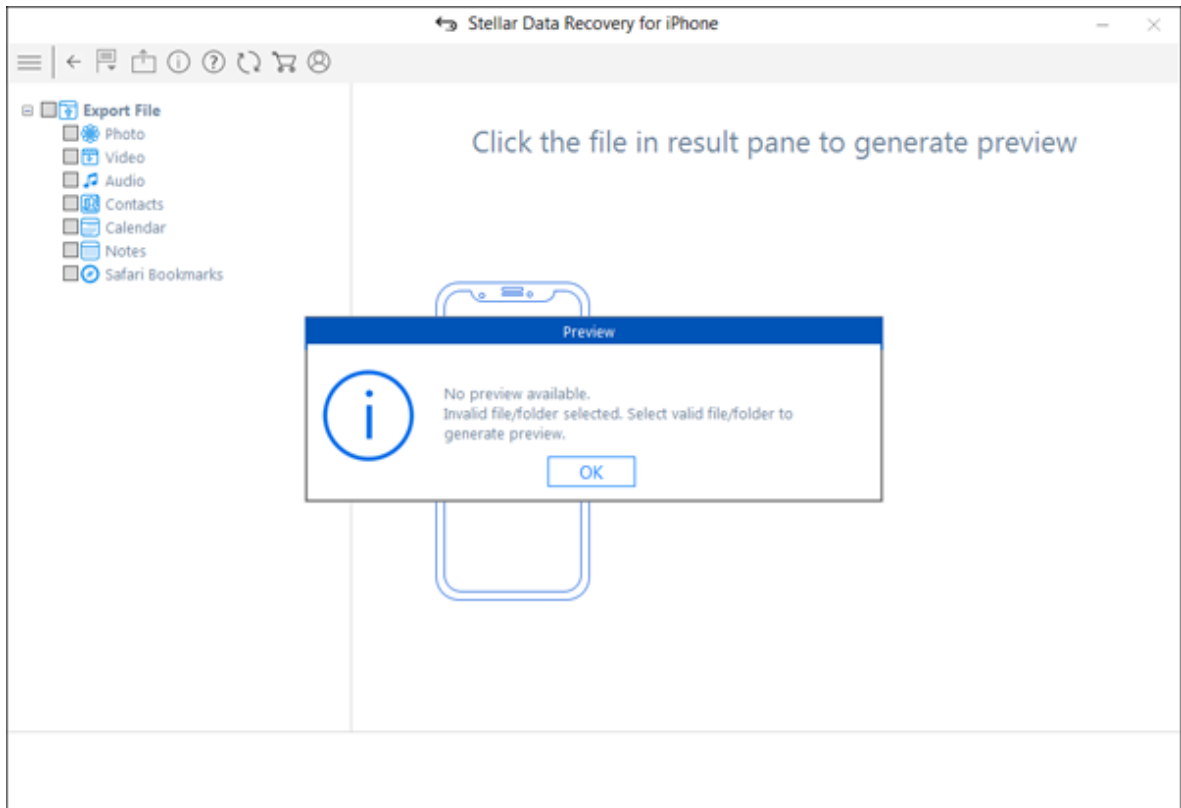

7. Click **Transfer to iPhone** to import the selected data.
8. A dialog box is displayed showing the progress of the transfer process. You can click **Stop** button in the dialog box to stop the file transfer process.

9. Data Saved Successfully dialog prompts.

Note:

- If in case you select the invalid format of the file or the selected file is severely corrupted and application is unable to detect it, then a message prompts on the screen indicating the wrong file.

- To proceed to the transfer process, you need to select the appropriate file/folder.

Languages

In order to use **Stellar Data Recovery for iPhone** software in your preferred language, the application provides an option to select any of the desired language. Using the Languages button, you can change the entire application to a different language at any time/instance without having to re-install the application.

In order to change language of the application instantly, go through the following steps:

1. Run **Stellar Data Recovery for iPhone**.
2. Click **Languages**  button from Menu Bar.
3. From the options displayed, select the required language.

FAQs

1. Can Stellar Data Recovery for iPhone recover all of my deleted data?

Yes, with **Stellar Data Recovery for iPhone**, you can recover deleted Contacts, Messages, Call history, Calendar, Notes, Reminders and Safari Bookmarks from your iOS device in an efficient manner. However, the software might not be able to recover the deleted data if data deleted is overwritten by any new data.

2. Can I preview messages before recovering them?

Yes using **Stellar Data Recovery for iPhone** software you can preview Contacts, Messages, Call history, Calendar, Notes, Reminders and Safari Bookmarks before recovering them.

3. In how many formats can I save the contacts after recovering them using Stellar Data Recovery for iPhone software?

You can save the contact in three formats using **Stellar Data Recovery for iPhone** software after recovering them. You can save them in VCF, CSV and HTML formats.

4. Can I synchronize my photos and contacts to my iOS device after recovering data using Stellar Data Recovery for iPhone?

Yes, you can synchronize photos and contacts to your iOS device using iTunes.

5. Why do I receive this error message after installing the application "Cannot find import; DLL may be missing, corrupt or wrong version File "MSVCP100.dll", error 126"?

This error message appears if your Windows is not updated. You need to download the updates from <http://www.microsoft.com/en-in/download/details.aspx?id=5555>.
